→ Who (people on the team) ←
Weipeng Cao (wwcao@colorado.edu)   Lacey Conrad (laco9372@colorado.edu)   Austin Linn (linnaj@colorado.edu)   Dmytro Ryzhkov (dryzhko@gmail.com)
→ Title (of the project) ←
Hobby Hub
→ Description (short description of the project) ←
A networking website for crafts, hobbies and similar interests.
→ Vision Statement (what you would tell potential customers) ←
Connect with people with similar interests, hobbies, and crafts.
→ Motivation (why would you develop this?) ←
So far, a popular website like this does not exist. People frequently like to exchange ideas or form interest groups based off their hobbies and crafts.
→ Risks (to project completion) ←
- Trying to incorporate too many topics.   - Scalability   - Drawing people to use the website (advertisement)   - Whether or not to leave it strictly social or add a wiki section
→ VCS ←
Name of version control software you will use:
GitHub
